---

Summary:
Computer Engineering student with strong foundations in software development and problem-solving. Proficient in Java, Python, Node.js, React, Express, MongoDB, MySQL, and modern web technologies. Experienced in building real-world projects and passionate about developing scalable, innovative solutions in collaborative environments.

Education:
Bachelor of Computer Engineering
Saraswati College of Engineering, Mumbai University
Expected Graduation: March 2026 | **CGPA:** 8.30

Technical Skills:
Languages: Java, Python, JavaScript | **Frontend:** HTML5, CSS3, React.js, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js | **Database:** MongoDB, MySQL
Tools & Concepts: Git, GitHub, AWS, REST APIs, JWT, Postman, Agile

---

Projects

- **Complaint Management System:** Web application for complaint tracking, management, and analytics with enhanced UI.
- **Parents-Teacher Portal:** Communication system enabling seamless interaction between parents and teachers.
- **Investment Portal:** Investment calculator and stock trading platform with balance management features.
- **Fintech – AI Powered Accountant:** MERN-based financial management system with AI-driven expense tracking and tax insights.
- **Vendor Place Allocation System:** Smart vendor allocation system with license verification and congestion optimization.
- **AI Voice Disorder Detection System:** ML-based system for voice disorder detection using audio analysis and classification.

Internships & Jobs :
Prodigy Infotech (Web Developer Intern)

- Developed and maintained web applications with improved UI/UX.
- Collaborated on feature development and responsive design.

UD Studios (MERN Stack Developer Intern, paid)

- Handled full-cycle development from design to deployment.
- Collaborated with clients and optimized performance and scalability.

KalkiDigital (MERN Stack Developer Intern, paid)

- Building full-stack applications using MongoDB, Express.js, React.js, and Node.js.
- Developing REST APIs and improving application performance.

EnergiSpeak Analytics (Full time Job – Pursuing)

- Handling overall software using MongoDB, Express.js, React.js, and Node.js.
- Maintaining the software when error occurs and updating new versions.

Certifications:

- Java Programming – Coursera
- Data Analysis – Accenture
- Generative AI – Microsoft
- Hackverse 2025 | CodeCrafters 2.0 2025 | Avishkar 2025 Participation
